

### BGDWS-1500 ♦ BGDWS-HFF

These BevGuard® Drinking Water Systems utilize one of two popular BevGuard® SQC Cartridges. Each contains a 0.5 micron compressed carbon block and polyphosphate scale inhibitor. The carbon block provides tremendous capacity to reduce impurities and sediment that may be present in your drinking water. The carbon block has millions of active sites on its surface and within the structure which can absorb impurities like a sponge, and can attract and hold other types of impurities to its surface like a magnet. Additionally, these filters can catalytically breakdown other impurities very similar to the way a catalytic converter works in your automobile. The scale inhibitor reduces the accumulation of minerals that lead to hard water spots from lime scale build up on your sink surfaces, and can provide scale free water for coffee brewing. The combined sediment, carbon block, and scale inhibitor ensure that you are getting the cleanest and best tasting water possible.

BevGuard® replacement cartridges are easily installed with a simple twist and push action.

Utilizing Patented Scale control to ensure scale free drinking water, these filters provides four times the scale reduction capacity compared to most other brands.

#### DRINKING WATER SYSTEMS FEATURE:

- Metal housing design
- Three O-ring design provides a water tight seal
- Economical alternative to expensive filter substitutes
- Delivers clean, clear water that looks and tastes great
- Injection molded cartridge liner
- Reduces sand, silt, sediment, rust, chlorine taste and odor, and scale from your drinking water
- Does not remove minerals which may be beneficial to health
- Operating Pressures: 25 to 125psi
- Operating Temperatures: 35 to 100° F
- NSF Certified Cartridges

BGE-1200S

BGE-3200S

#### PRODUCT DETAIL

Model Number	Description	Replacement Cartridge	Micron	Capacity (Gallons)	Flow Rate	Connection	Case Qty.
<b>BGDWS-1500</b>	BevGuard® Drinking Water System w/Long Reach Faucet	BGE-1200S	0.5	1,500	0.5	1/4" FPT	4
<b>BGDWS-HFF</b>	BevGuard® High Full Flow Drinking Water System	BGE-3200S	0.5	29,000	2.1	3/8" FPT*	4

\* Supplied with 3/8 JG Fittings

Replacement Cartridges		
Model Number	Description	Case Qty.
<b>BGE-1200S</b>	BevGuard® BGE-1200S - 0.5 gpm flow - 0.5 Micron - 1,500 Gallon Capacity - Metal Housing Approx Size: 6 1/2" x 3 3/16"	4
<b>BGE-3200S</b>	BevGuard® BGE-3200S - 2.1 gpm flow - 0.5 Micron - 29,000 Gallon Capacity - Metal Housing Approx Size: 16 1/2" x 3 3/16"	4

*Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.*
